Hardy Water Lily Rose Arey

Without question the finest hardy pink. The petals are long and oval-formed and uniform deep pink.
Each Postpaid\$3.25

Hardy Water Lily Comanche

The rich apricot and red markings upon opening, changing to deep copper and orange shades, create a contrast so much that one lily seems to have several different colored flowers at one time. Vigorous and free flowering.
Price each Postpaid\$4.25

BELDT'S WATER GARDENS

HAZELWOOD, MISSOURI

Bright red flowers borne in profusion. Free flowering.
Each Postpaid\$4.00

Wm. Falconer

Free flowering, velvety, very deep red, almost shaded to black. One of the finest red hardy lilies.
Each Postpaid\$10.00

POOL PAINTS & FERTILIZERS

Asphaltum Enamel

A new pool does not have to be seasoned if the pool is painted one coat of asphaltum enamel. The concrete walls must be perfectly dry when applying this enamel. Just give it one good coating, let it dry 24 hours and it is ready to be filled. Black asphaltum enamel also has the advantage of keeping algae from forming on the walls. One gallon of Asphaltum enamel will cover a surface of about 150 sq. ft., all depending on the smoothness of the concrete finish.

Per quart, Black..... \$1.00
Per gallon, Black\$3.50

Magic Water Lily Food

A chemical water lily fertilizer. One quart is sufficient for one bushel of garden soil. Per quart\$0.75

Colored Lily Pool Paint

POOL PAINT. Beldt's Sky Blue Plastic Enamel beautifies and stops minor leaks. This non-poisonous plastic enamel is our answer to the many requests we have had for an enamel suitable for concrete pools. This special paint will give a unique color to the pool. Furnished in a beautiful shade of sky blue. Beldt's plastic Enamel will add life and beauty to the appearance of your water lily pool. Price.

Per quart..\$2.00 Per gallon..\$7.50

Planting Lotus

DIRECTION: Use boxes at least 18" square, 12" deep or larger. Fill 3/4 with good garden soil, add one-half pint water lily fertilizer. Tamp soil, use brick; lay lotus roots flat on top and fill box with sand.

SPECIAL WATER LILY COLLECTION AT SPECIAL BARGAIN PRICES

How to Plant Your Water Lilies

Hardy Water Lilies

Can be planted at any depth from 6 inches to 24 inches. They will, however, do best at a depth of about 12 inches because the deeper you plant them the more strength is consumed in under water growth; also the flowers are not quite as strong if they are planted too deep. Use good, rich soil and for each bushel of soil add one quart of our Magic Water Lily Food, which comes in quart cartons at 75c each. This will insure a vigorous growth and will build up the soil to last for at least two or three years. It is best to lay the hardy water lily root flat about 3 inches below the surface of the soil in the box and do not forget to put about 3 inches of sand on top of the box to keep the water clear.

Planting Time

The best time to plant hardy water lilies, contrary to many practices, is after the water has become warm and the new roots have made a substantial growth. Hardy lily roots which are cut too early are retarded in growth the first year and will not produce nearly the flowers than if you wait and have your hardy lilies shipped in May. They can be shipped with flower buds ready to open. You get flowers sooner by waiting a little longer with your planting.

Tropical Water Lilies

Are shipped after the weather is warm, which in the latitude of St. Louis is about May 20th. Southern shipments are made as early as the later part of March. The

important thing in planting tropical water lilies is not to plant them any deeper than they have been growing in the pot. Pack the soil down solid so that the compact root growth in the pot in which the lily has been grown will not settle to the bottom of the lily box. In other words, if you leave the soil loose and plant the lilies, there is danger that the clump of dirt in which you receive this tropical lily will settle down to the bottom of the box. Do not plant the tropical water lily too deep. It is best to lower the water surface of the pool so that the tropical lilies are not more than 6 inches below the water surface, or else raise the box by placing several bricks under it. Then after the lily has been growing for a month and is well established in your pool, you may lower this box. For planting tropical water lilies use boxes at least 16 inches square and 12 inches deep. Fill them with good rich soil and use ½ pint of our Magic Water Lily Food to each box. Very good results and wonderful effects may be had by using a 20 inch square box and planting two tropical water lilies to one box. This will give you more flowers from one box and you can also plant different colors and improve the general appearance of your lily pool tremendously. The planting of water lilies is really not different than planting most other kinds of plants except that you set them under water. Never plant your water lilies first and then fill the pool. It is best to have the pool filled at least a week in advance so that the water has had a chance to get warm. The newly planted lilies will grow much better in aged water than in fresh water. Plants do best, and you keep your pool much cleaner, if you do all your planting in various boxes instead of covering the entire bottom of your pool with soil. Never use any kind of metal containers.

GOLDFISH

We do not ship goldfish but we do carry large numbers of goldfish during the spring of the year for local distribution.

Our Location, Terms, Policies

We are located 12 miles west of St. Louis City Limits, west of the Municipal Airport, near the junction of Highway 66 and 140. The Mercury Assembly Plant is located on the east side of this Junction. To reach our place, turn west on Utz Lane and go to the end; it is only about half a mile long, and turn north on Howdershell Road about one half mile. You will find our place on the west side of Howdershell Road. There is a large brick chimney with our name 20 feet long.

BUSINESS HOURS

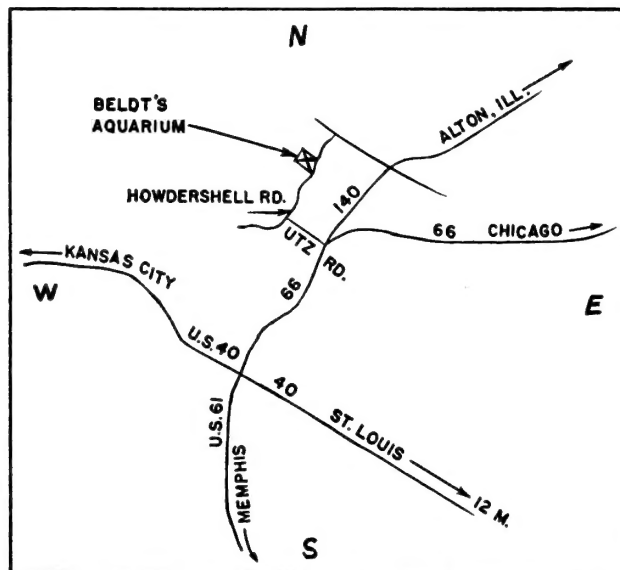

Mondays thru Thursdays 8 a. m. to 4 p. m. Fridays 8 a. m. to 9 p. m. and Saturdays 8 a. m. to 11 a. m. Closed Sundays and Holidays.

Cash with Orders

Please send sufficient money with order to cover the whole bill. We decline to ship "Collect on Delivery" unless 50 per cent remittance be made to guarantee acceptance.

Forwarding

We pay the postage on all hardy water lilies. All other merchandise and tropical water lilies are quoted net f.o.b. Hazelwood, St. Louis County. Do not send any remittance to cover express charges as these are collected when the Express Company delivers the shipment. If you desire merchandise sent parcel post, make your remittance large enough to cover postage or you can advise us to c.o.d. the parcel for the amount of postage due.

We are located on Howdershell Road ½ mile north of Utz Lane. Mail Address: Hazelwood, Missouri. Do not address mail to Howdershell Road. Phone TEmple 7-3350.

Beldt's Aphis Spray

This spray, if used according to directions, will keep your plants hardy and free from aphis and other injurious insects. Aphids usually begin showing up in July when the weather is dry and hot and you should be prepared and have this spray on hand. Occasionally many aphids collect on water lily leaves and other plants, also on the sides of the pool, right above the water surface. We have used this aphis spray compound for quite a number of years. It is very effective. All you need is a small one pint hand spray obtainable at most hardware stores.

This spray also kills various other insects such as misquitos, etc. If you follow the directions you can use this spray without any fear of harming plants or fish in the pool. It is also a very effective spray for roses.

It is equally effective on both chewing and sucking insects. Full directions for use are on the container.

Per Pint\$1.50
Per Quart 2.75

One pint of Aphis Spray will make 3 gallons of spray solution.
